

boso TM-2450 The New Generation 24-Hour Blood Pressure Monitor

boso - your partner for health

# Even more comfort for your patients, even more performance for you

When using professional devices in a medical setting, you not only need precise entries but also intuitive operation and easy handling in practice. Use your computer to enter the desired settings for 24-hour monitoring (intervals, beginning and end of day and night mode or the pre-saved automatic programme).

The device is allocated to the patient via an ID number. No personal data is stored on the device – all data is stored anonymously and in compliance with data protection.

With the boso XD profile manager software programme, you can make a diagnosis in seconds. Measurement tables, long-term profiles, mean arterial pressure, pulse pressure and morning blood pressure surge are calculated and the data statistically evaluated. All evaluations can be printed as easy-to-understand tables and graphs - for perfect documentation, supplementation of your patient documents or to provide to your patients.

### 24-hour blood pressure monitoring High-performance and effective

- Measures during pumping and draining
- Arrhythmia detection
- Activity sensor
- Quick and easy programming
- Freely programmable intervals
- Sleep button
- Stores 600 measurement values
- Very comfortable thanks to a small and lightweight design with only 2 batteries
- Extremely quiet
- Ergonomic hip bag including carry strap and belt

20,5% smaller 22.5% lighter 33% quieter

compared to the previous model, boso TM-2430 PC 2

# **ABPM** Guidelines

The boso TM-2450 and the boso XD profile manager software programme fulfil the practical ABPM guidelines of the European Society of Hypertension regarding the following:

#### boso TM-2450 (measuring device)

Clinically validated in compliance with DIN EN ISO 81060-2Precise blood pressure measurement on the upper arm

# Significant improvements in the new generation of devices:

- Cardiac arrhythmia displayed to indicate atrial fibrillation (as an example)
- Smart automatic inflation for measurement without re-pumping
- Detection and logging of artefacts
- Logging of active and resting phases
- Logging of surrounding temperature and atmospheric pressure impacting factors on blood pressure behaviour
- Extremely quiet pump for a significant reduction of disruption during the sleep phase

- Essential clinical report (one page)
- Standardised depiction of all blood pressure measurements with day and night mode and separated target pressure zones
- Display of average systolic and diastolic blood pressure as well as heart rate
- Nighttime blood pressure drop (%) for systolic and diastolic blood pressure
- Statistics summary for time-weighted average systolic and diastolic blood pressure and heart rate for the 24-hour period, during the day (awake) and night (sleeping), with standard deviations and number of valid blood pressure measurements
- Option to display incorrect measurements (artefacts)

#### Meets optional requirements:

- Option to display heart rate and mean blood pressure
- Comparison of repeated ABPM recordings
- Option to host data centrally

# For Your Practice

Benefit from easy operation, precise measurements and rapid, easy-to-understand evaluations of measurement data.

# For Your Patients

Now 20.5% smaller, 22.5% lighter, 33% quieter\* and the bag with belt + strap has been optimised for comfort.

\* values based on the boso TM-2430 PC 2

# Scope of Delivery

24-hour blood pressure monitor boso TM-2450

Transport case

Battery charger

2 x battery packs with two batteries

Cuffs for adults (wipe-clean, latex-free) - Size M (13 x 62 | 20 – 31) - Size L (16 x 68 | 28 - 38) - Cuffs, optional: S (10 x 38 | 15 – 22), XL (17 x 76 | 36 – 50)

Hip bag with removeable carry strap and belt

Instruction manual - boso TM-2450 - profile-manager XD

Documents - Medical Devices Book - Warranty

boso profile-manager XD software

USB connection cable

# 96%

of all German general practitioners, physicans and internists work in practice with blood pressure instruments from boso. (API survey conducted by GfK 01/2016)
